

3D isotropic turbulence 125³ -- held-out cube, frame 153, z-midplane

19,531 sensors (1%) on each of U_x and U_z ; U_y and p never observed. Not shown (no field dumps on this host): CoNFILd, S3GM, DeepONet++, Gen4Turb. Number in each panel: single-sample relative L_2 for that channel (standardized units).
